

Twinset

TWINSET

Own your voice. Get paid. Built for the culture.

An overview for the artist — exactly how it works and how you get paid.

What Twinset is

AI is already cloning artists' voices — with no permission, no credit, and no pay. **Twinset is the opposite.** It lets *you* create an authorized AI version of **your own voice** — a "twin" — that you **own**, **control**, and **get paid** for every time it's used.

It's not a label deal. It's not a buyout. **It's ownership.** You license your twin; you never hand it over. Built by the culture, for the culture.

What you get

- **Your own twin is FREE, forever** — make unlimited songs in your own voice at no cost. Type an idea, get a track in your voice, anytime. Your twin becomes your studio. Others pay to use you; you never pay to use yourself.
 - **Ownership** — you own your voice and your twin. Always. Twinset only licenses it.
 - **Income** — you get paid **every time** someone uses your voice on a track.
 - **Control** — you approve every use, and you can **pull your twin down anytime**.
 - **Protection** — your name is never on anything you didn't approve (see the badge system).
 - **The spotlight** — as a founding artist, you're leading something for our people.
-

How you get paid

You set your own price per use. The splits:

	Feature (per use)	Downstream (streaming/ sync, etc.)	Publishing
Founding-100 (first 100 artists)	You keep 100%	Founding split (you keep the majority)	100% yours — always
Standard (after the first 100)	Standard split	Standard split	100% yours — always

- **You set your feature price.** Your worth, your call.
- **Twinset takes 0% of your publishing — ever.**
- *(Downstream/streaming splits are being finalized with counsel — you'll see the exact terms in writing before anything is signed.)*
- **Your payout is never reduced** by anyone else's fees.

How it works (4 steps)

1. **Build your twin** — record clean vocals fresh, or use clean vocals you already own.
Your choice.
2. **You approve it** — nothing goes live until you sign off.
3. **Makers use it** — artists and fans make tracks with your voice; **you get paid each time.**
4. **You stay in control** — approve public uses, adopt the ones you love onto your own catalog, pull it anytime.

Your name is protected (the badge system)

Every track made with your voice carries an honest label, so **the world always knows where you stand:** - ☐ **Artist-Approved** — you heard it and you stand behind it (official, catalog-ready). - ☐ **Your real voice, not endorsed** — made with your licensed voice, but you haven't co-signed *that* track.

You never have to worry about something bad going out in your name. If you didn't vouch for it, the label says so.

Honest promise: Twinset gives a maker a *studio-ready starting vocal* in your voice — **you're always the final artist.** We never claim it's a "perfect finished song." Your craft and your approval finish it.

Why founding artists matter

The **first 100 artists keep 100%** of their feature price — unheard of anywhere else. It's our thank-you to the ones who build this with us. As a founding artist, you're not just on the platform — **you're leading it.**

Hear it

Ask to hear a demo. Once you hear a real voice on a track, you'll get it instantly. (*Belief beats explanation.*)

The honest part

This is being built the right way. A **formal creator agreement** — drafted by our attorney — spells out every term in writing before you sign anything. You'll never be asked to commit on a handshake. **You own it, you approve it, you can pull it, and you get paid in full.** That never changes.

The ask

Be one of the founding voices of Twinset. Own your voice, get paid for it, and lead something built for our people — before anyone else.

Let's talk. Let's build this together.

Twinset — Protect your voice. Protect your image. Cash it in.
